Project Name	Thyroid Classification
Maximum Marks	3 Marks

Define Problem Statements :

Patients with thyroid disorders often face delayed or inaccurate diagnoses due to the reliance on traditional, manual evaluation methods. This can lead to prolonged suffering, incorrect treatments, and a decline in overall health. The need for a faster, more accurate diagnostic tool is critical to improve patient outcomes and quality of life.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	patient experiencing symptoms related to thyroid disorders.	get an accurate and timely diagnosis for my condition.	the diagnostic process is lengthy and often inconclusive.	it involves multiple tests and waiting periods, and sometimes the results are not clear.	worried and frustrated about my health and the uncertainty of my condition.
PS-2	patient suffering from thyroid-related symptoms.	understand my health condition and get appropriate treatment quickly.	the diagnostic process is complex and slow.	it requires several different tests and follow-up visits.	anxious and impatient, fearing that my condition might worsen while waiting for a definitive diagnosis.
